

# THE ADVANTAGES OF SECURERx

A TROY SECURITY SOLUTION

SecureRx delivers advantages not available with any other Rx printing solution which is why it's used by 500+ Health Providers. Providing a quick ROI, SecureRx also increases security and works with all the leading EHR systems. Even in health facilities using ePrescribe, 20% of prescriptions are still distributed on paper. For those times, SecureRx is the trusted solution for secure, compliant, fraud-resistant protection.

## Why SecureRx?

In comparison to preprinted prescription forms, SecureRx saves time and cost, exceeds security, and completely avoids the theft risk associated with preprinted forms. In one New York case alone, an estimated 1.4 million preprinted forms were stolen and sold on the black market, contributing to the opioid epidemic across the US.

## 9 Situations Requiring Printed Prescriptions

- 1 ER Discharges
- 2 Conditional Prescriptions
- 3 Controlled Substances
- 4 Price Shopping
- 5 Doctor Objections
- 6 Medical Equipment
- 7 Compound Medications
- 8 Long, Complicated Directions
- 9 Patient Requests

### Reduce Time & Cost

- Recoup ROI quickly by saving 50% over costs of using preprinted prescriptions.
- Eliminate cost of expensive preprinted stock as security features are applied to plain paper at the time of print.
- Avoid time spent on purchasing, chain of custody requirements, and tracking of preprinted Rx forms.

### Optimize Workflows

- Simplify workflows by printing prescriptions, referrals and condition information.
- Prevent calls caused by illegible handwriting between pharmacy and caregiver.
- Easily update settings as federal CMS requirements are revised.

### Increase Security & Compliance

- Completely avoid risk of preprinted form theft.
- Advanced features exceed CMS security requirements and protect against fraud, alteration, and falsification.
- Verify prescription data and mark prescriptions as filled via website, mobile QR code reader, or POS.
